

Kickapoo Park CONSTRUCTION

G.P.S. (Global Positioning System)

DonRoseboom,U.S.GeologicalSurvey
Is in charge of stream restoration.

will control the huge earthmovers with pin point accuracy. The stream designed by computer is the result of years of experience and input by Don Roseboom of the U.S.G.S. Thus, computer design interacts thru G.P.S. with G.P.S. and computer controlled equipment.

SHAPING NEW LOTS

G.P.S. controls large earth movers.

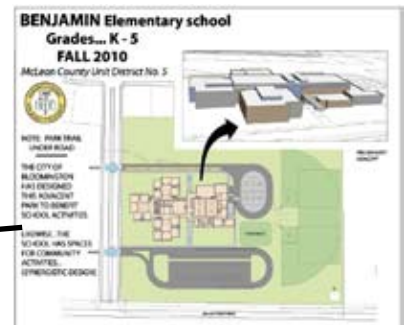

Pedestrian Bridge
A "signature" structure of the park plus the key to erosion control.

Base of elevated viewing deck.

Fenced for protection during construction. Trees were here when Stephan Ireland settled the grove in 1820's.

Benjamin Grade School
To open Fall 2010

Children & Elders Forest
www.ceforest.org

Children & Elders Forest will in 2009 establish a 100 tree grove in the new Kickapoo Park. Their goal is to add 100 trees to the northside of the grove of trees known as Ireland's Grove. It is in the newly developing 88 acre park surrounded by The Grove subdivision.

This is a unique story because in the 1820's trees determined where early settlers built their homesteads. One such settler was Stephan Ireland. This is how Ireland Grove and Ireland Grove Road came to be.
